BOYU Cold Former 阳模设计的优越特性

滑块阳模设计实现冲头与工件同步满足加工各类异型件产品。
The design and implementation of the punch and workpiece slide mold meet processing all kinds of special items.

结构紧凑且设有“防破坏”保险机构。
It has a compact structure and has a "anti - damage" insurance agency.

螺母机机构装配便捷，顶出力强，便于调节。
The mechanism of nut machine is easy to assemble, with strong jacking force and easy adjustment.

多工位螺母冷镦机是金属冷挤压成型机械中的一种高效率、全自动的专业化机械设备，其本身优越冷镦机成型工艺和先进加工特性使得它能广泛应用于国民经济各个领域，如：紧固件、五金件及异型非标件的加工生产。

Multi station nut cold heading machine is a kind of high efficiency and automatic specialty in metal cold extrusion forming machineryChemical machinery and equipment, its own superior cold heading machine forming technology and advanced processing characteristics make it can be widely usedit is used in various fields of national economy, such as fastener, hardware and special-shaped non-standard parts.

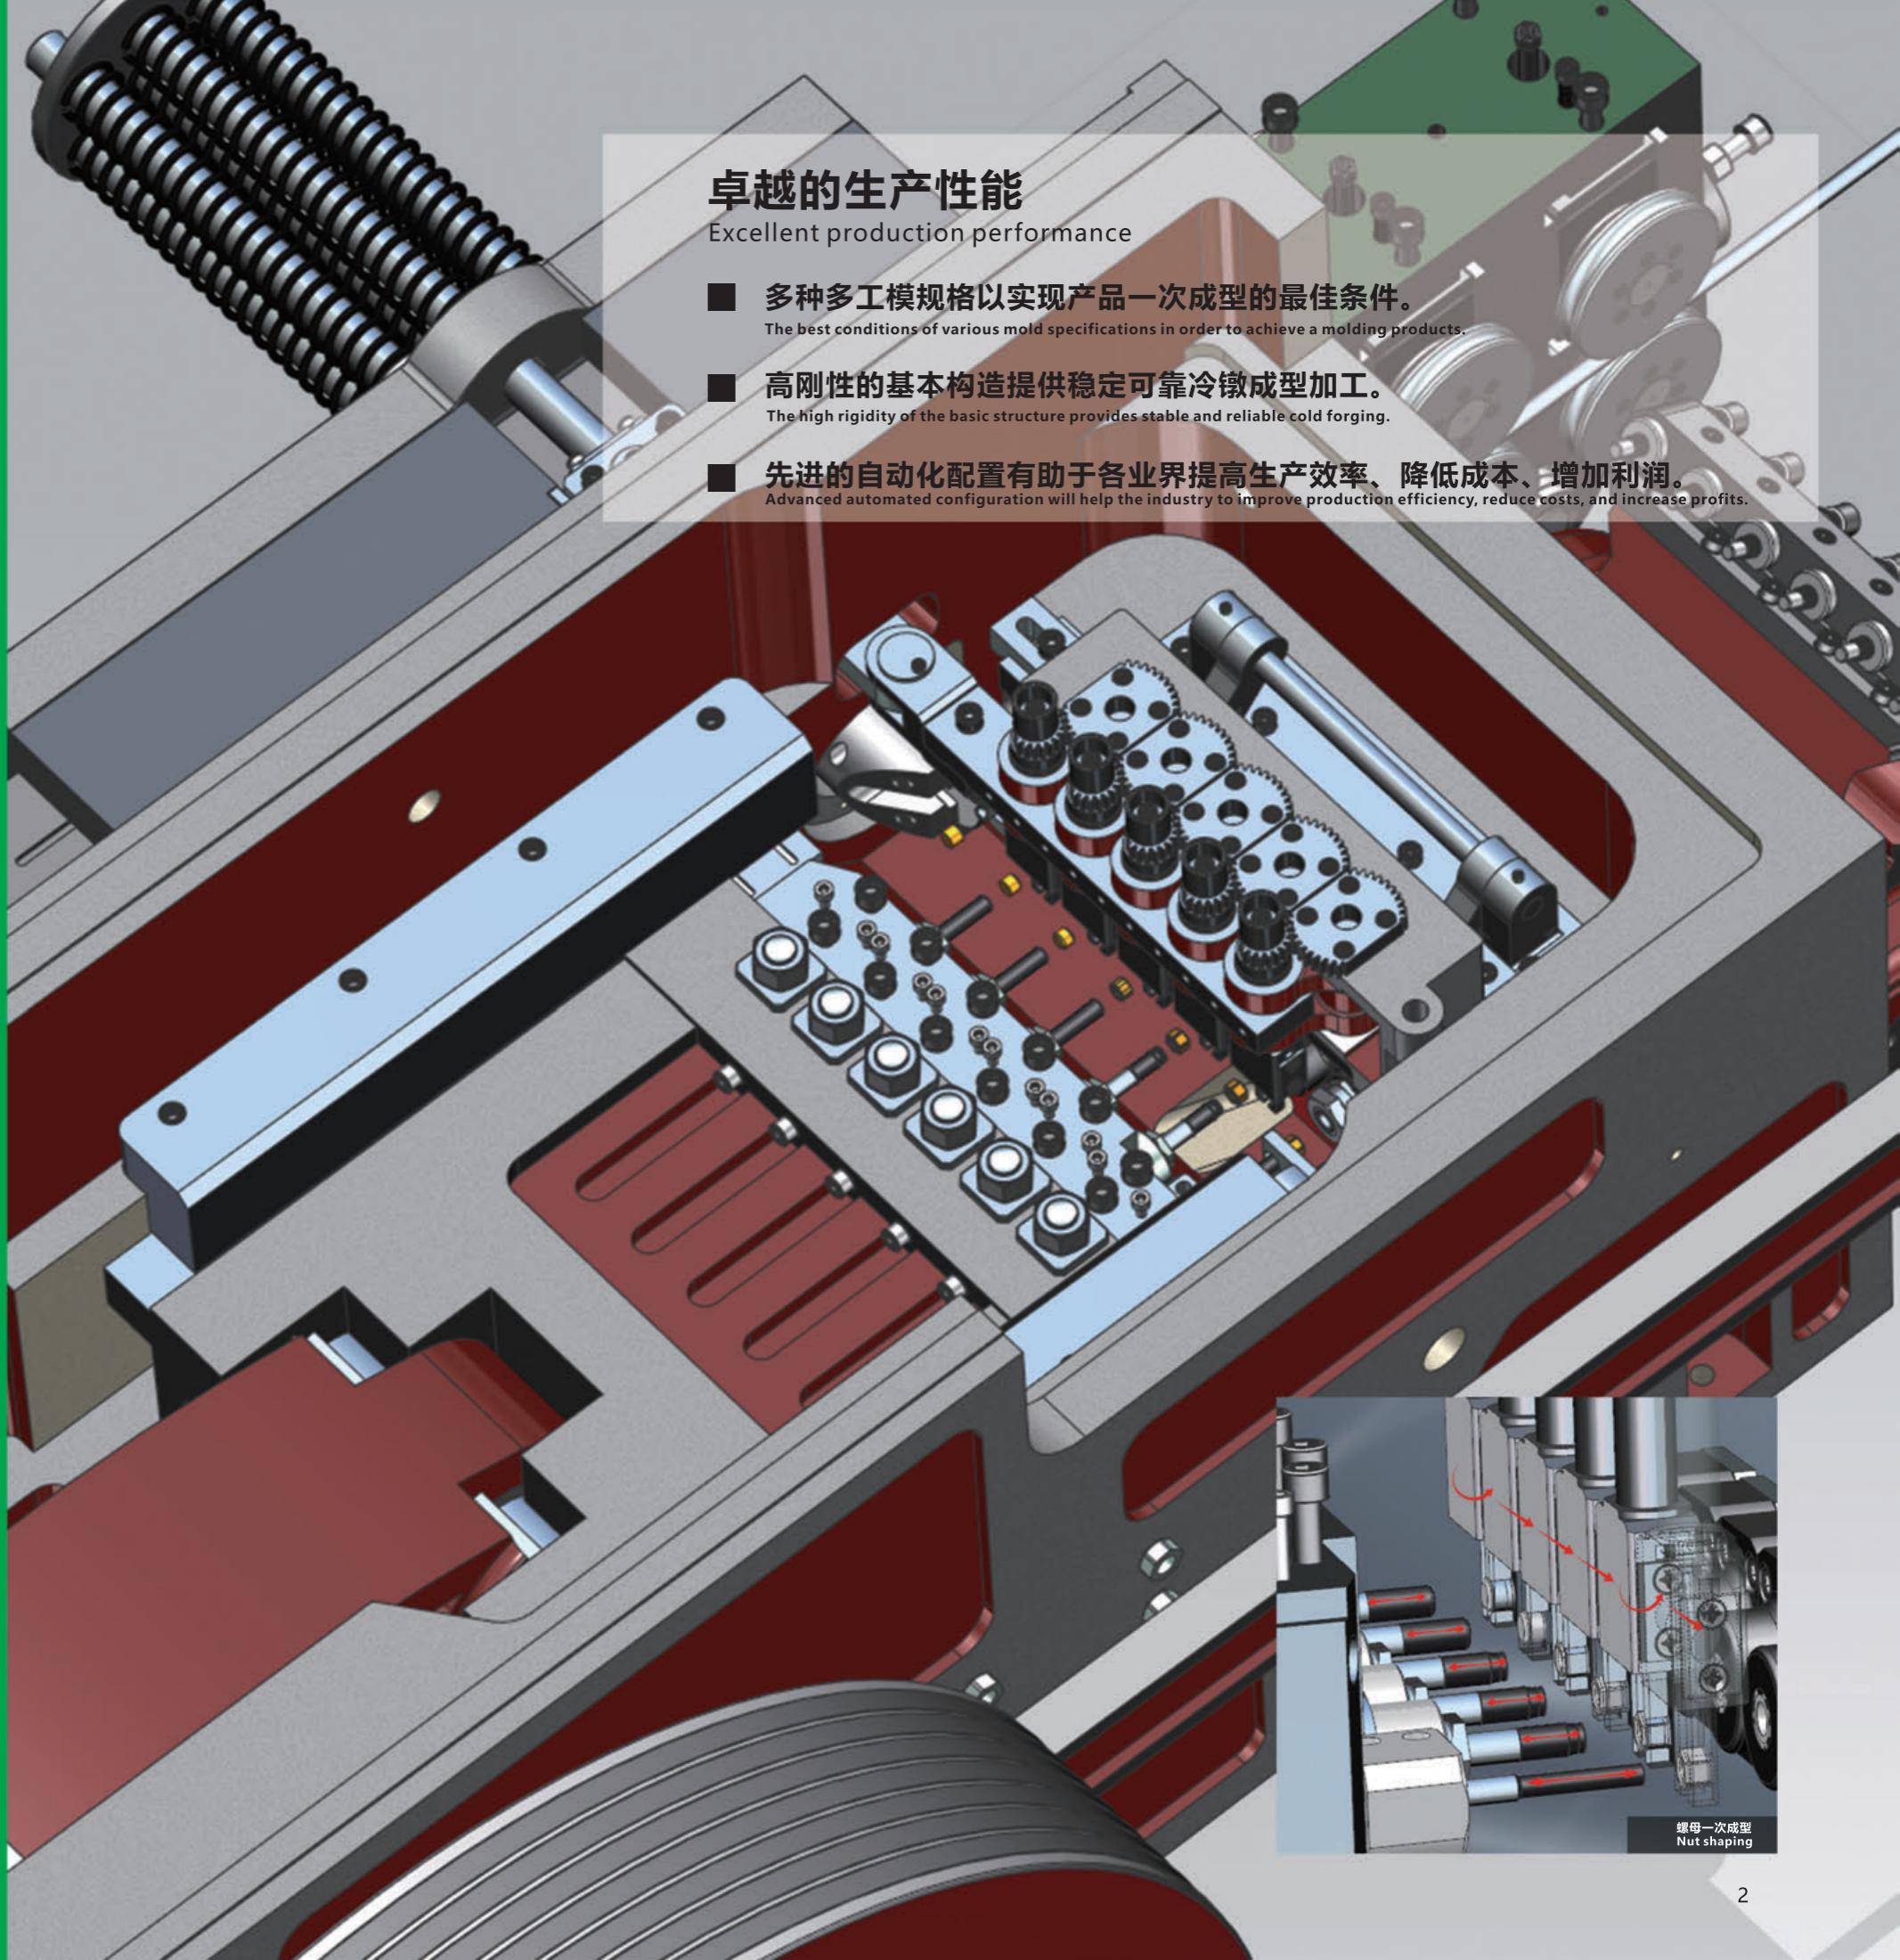

卓越的生产性能

Excellent production performance

■ 多种多工模规格以实现产品一次成型的最佳条件。
The best conditions of various mold specifications in order to achieve a molding products.

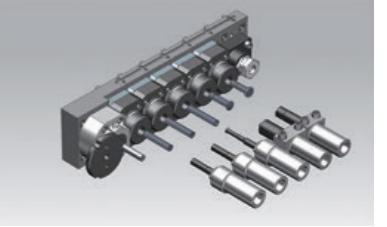

■ 高刚性的基本构造提供稳定可靠冷镦成型加工。
The high rigidity of the basic structure provides stable and reliable cold forging.

■ 先进的自动化配置有助于各行业提高生产效率、降低成本、增加利润。
Advanced automated configuration will help the industry to improve production efficiency, reduce costs, and increase profits.

丰富的螺母冷镦机产品能够满足各种零件的需要

Abundant nut cold heading machine products can meet the needs of various parts

选装
Optional

单速、双速或伺服电机。
Single speed, double speed or servo motor.

选装
Optional

挡料装置，提高进料精度。
The feeding device improves the feeding precision.

选装
Optional

变频器，在一定范围内无级调速。
Inverter, stepless speed regulation in a certain range.

选择
Choice

MT式滑块

11B-17B多工位螺母冷镦机
11B-17B Multi station Nut Cold Heading Machine

19B-60B多工位螺母冷镦机
19B-60B Multi station Nut Cold Heading Machine

选择
Choice

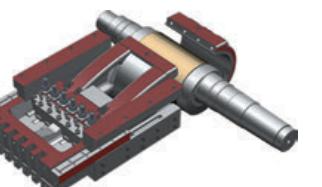

阳模PKO

选择
Choice

轴承式标准式

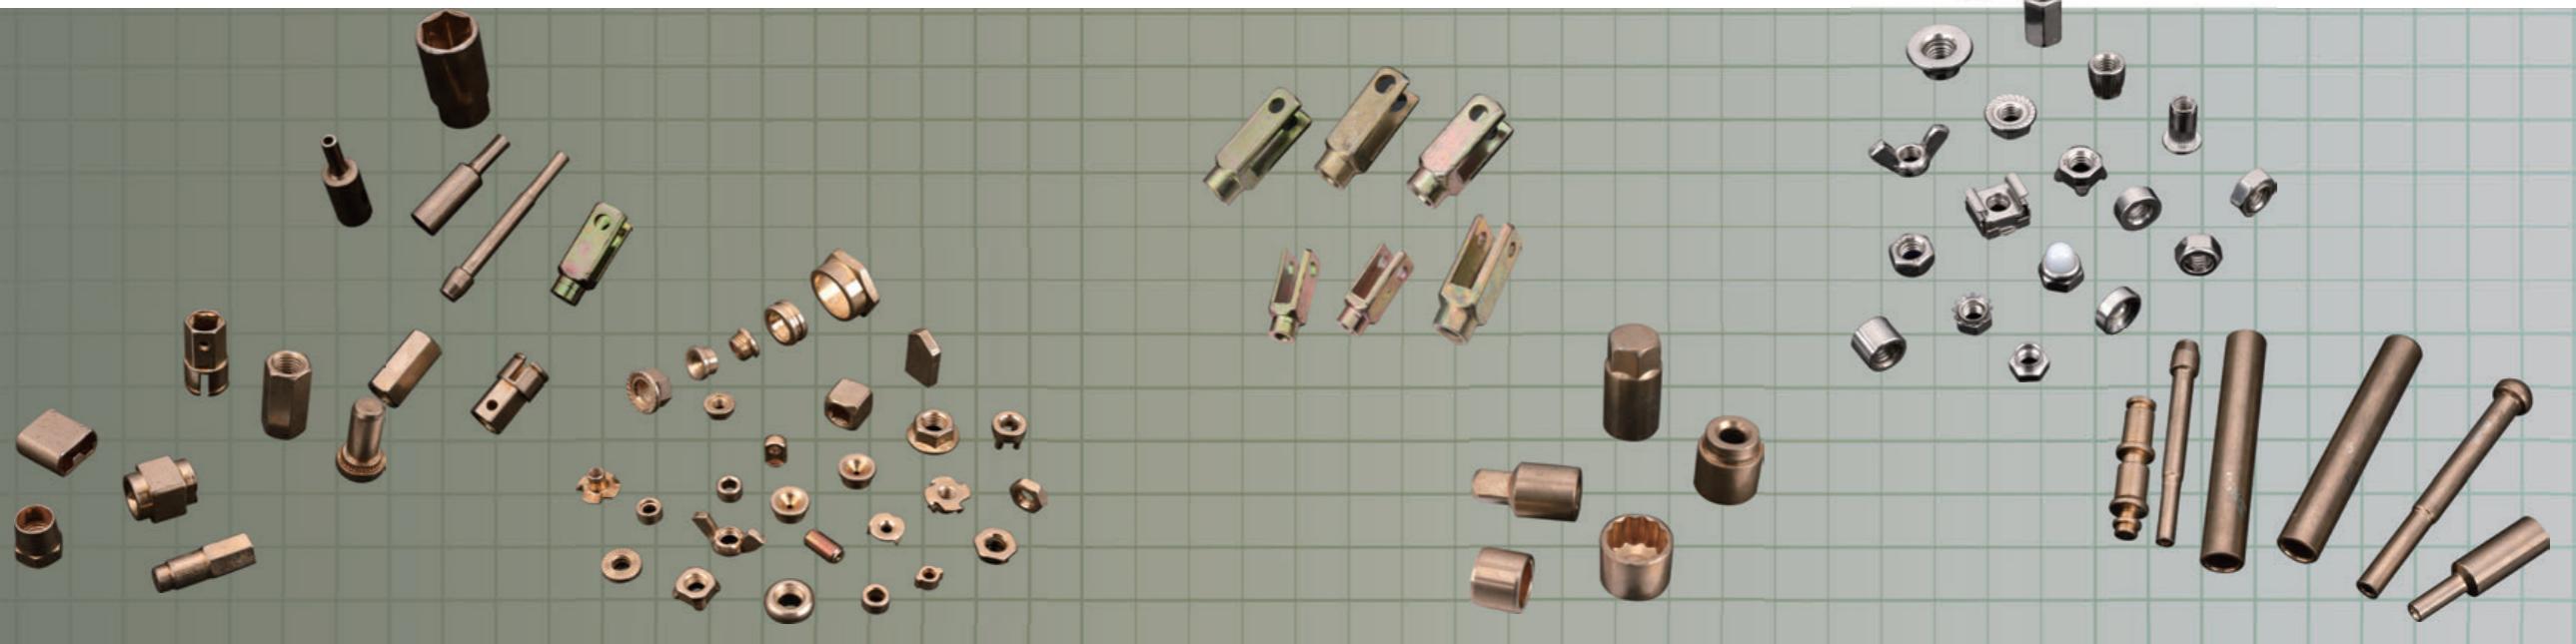

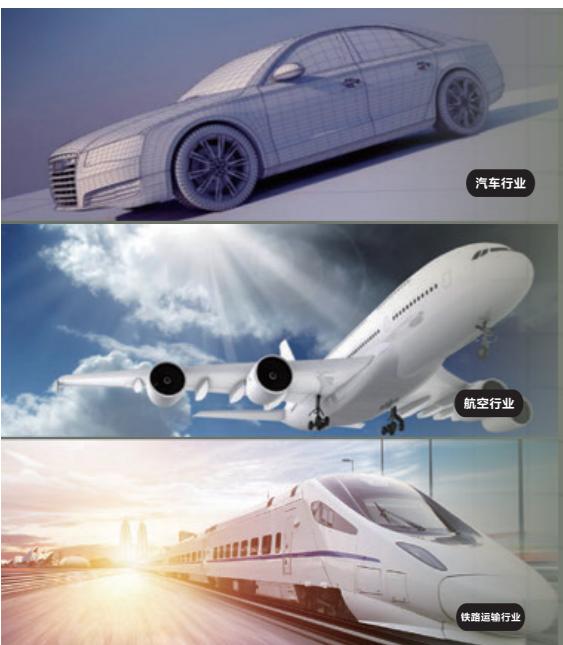

Bearing standard type
曲轴和冲击连杆采用全球最好的SKF轴承配合，适合加工普通产品，标准螺母。

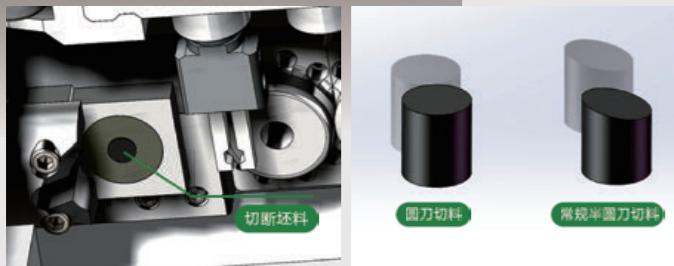

选择
Choice

铜套加长式

Lengthening of copper sleeve
铜瓦加长式曲轴与冲击连杆采用合金铜瓦配合，冲击承力大，使用寿命长，维修成本低。

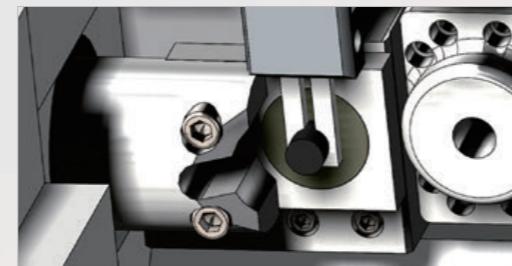

◆ 圆切刀和独立钳架夹料机构
Circular cutting blade and independent clamp frame clamping mechanism

切料采用整圆切割设计，线材切断时平行度得到控制使得线材断面更加平整，大幅提高材料合格率。

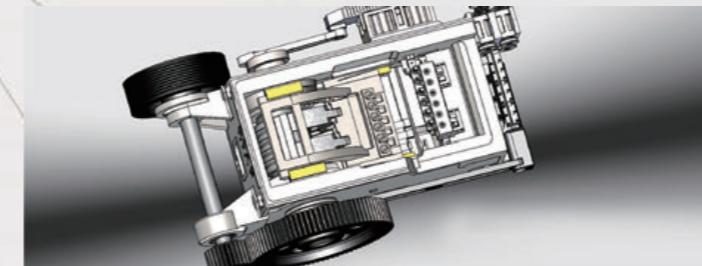

The cutting material adopts a round cutting design, and the parallelism is controlled during wire cutting, making the wire section smoother and significantly improving the material qualification rate.

独立的钳架驱动结构配合圆刀切完料以后，后顶棒把料推入夹钳，并运转入下一工位。

After the independent clamp drive structure is combined with the circular knife to cut the material, the rear top rod pushes the material into the clamp and transports it to the next workstation.

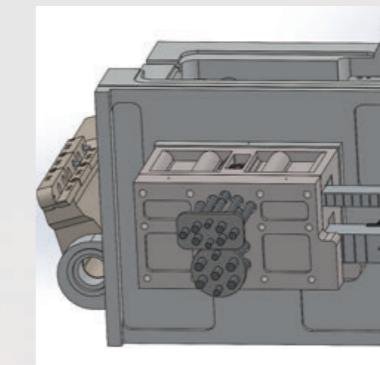

◆ 机身增加背轴配备主、副飞轮
The body is equipped with a back axis and primary and secondary flywheels

采用大模数齿轮刚性传动设计，传动稳定性和传动效率大幅提升，齿轮传递扭矩，比传统皮带损失更小。

Adopting a large modulus gear rigid transmission design, the transmission stability and efficiency are greatly improved, and the gear transmits torque with less loss than traditional belts.

◆ 双曲线凸轮机构，搭配一体式剪刀箱
Hyperbolic cam mechanism, paired with an integrated scissor box

剪切机构采用双S板驱动设计,一体式剪刀箱,一块S板驱动剪切刀杆进行往复切割运动,一块S板驱动钳架拉杆进行往复夹料运动。搭配圆刀使用相得益彰。

The cutting mechanism adopts a dual S-plate drive design, with an integrated scissor box. One S-plate drives the cutting rod to perform reciprocating cutting motion, while the other S-plate drives the clamp rod to perform reciprocating clamping motion. When used in conjunction with a circular knife, it complements each other.

其锻造力、主飞轮扭矩在传统冷镦机的基础上提高了30%-40%

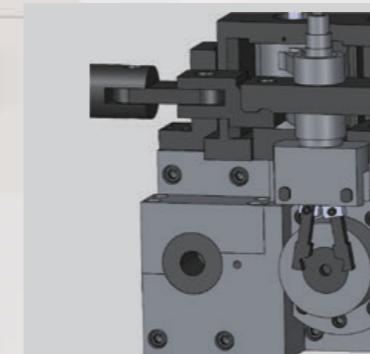

Its forging force and main flywheel torque have been increased by 30% -40% on the basis of traditional cold forging machines

27B-60B多工位零件成型机

27B-60B Multi Station Part Forming Machine

◆ 机械张钳结构
Mechanical tensioning clamp structure

钳架体升级为机械张钳结构，可根据产品自由伸缩，满足各种异型零件的夹持。

The clamp body has been upgraded to a mechanical tensioning clamp structure, which can freely expand and contract according to the product, meeting the clamping needs of various irregular parts.

◆ 滑块加长型尾翼，机身结构加强
Extended tail wing with slider, reinforced fuselage structure

滑块加长型尾翼设计,合模精度可以得到有效提升，延长模具寿命，节省模具成本，滑块侧板采用高碳合金钢,整体淬火处理，比传统侧板更加坚硬、耐磨、寿命长。

机身通过壁厚的增加、材质的改良和结构的优化，新设计的机体综合机械性能大幅提升。The extended tail wing design of the slider can effectively improve the precision of mold closing, prolong the life of the mold, and save mold costs. The side plate of the slider is made of high carbon alloy steel, which is quenched as a whole, making it harder, more wear-resistant, and has a longer lifespan than traditional side plates. The overall mechanical performance of the newly designed fuselage has been greatly improved by increasing wall thickness, improving materials, and optimizing the structure.

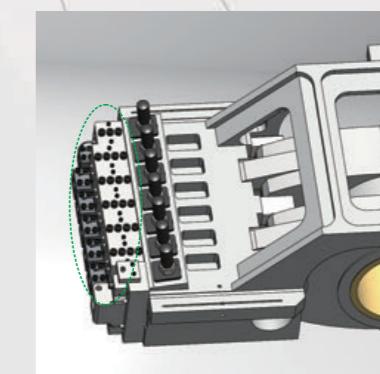

◆ 送料箱气缸压料机构
Feeding box cylinder pressing mechanism

送料箱采用气缸压料系统,调试压线轮时候更加省力，便捷。压力可调，防止压力过大导致线材压扁。

The feeding box adopts a cylinder pressing system, which is more labor-saving and convenient when debugging the pressing wheel. Adjustable pressure to prevent excessive pressure from flattening the wire.

◆ 新型冲棒供油系统
New type of fuel supply system for punching rods

滑块、冲模座内部设计油路，油嘴跟随滑块让冲棒不间断供油。

The internal oil circuit of the slider and die seat is designed, and the oil nozzle follows the slider to continuously supply oil to the punching rod.

优质的设计理念，铸就高精度、高效能、高寿命，低损耗

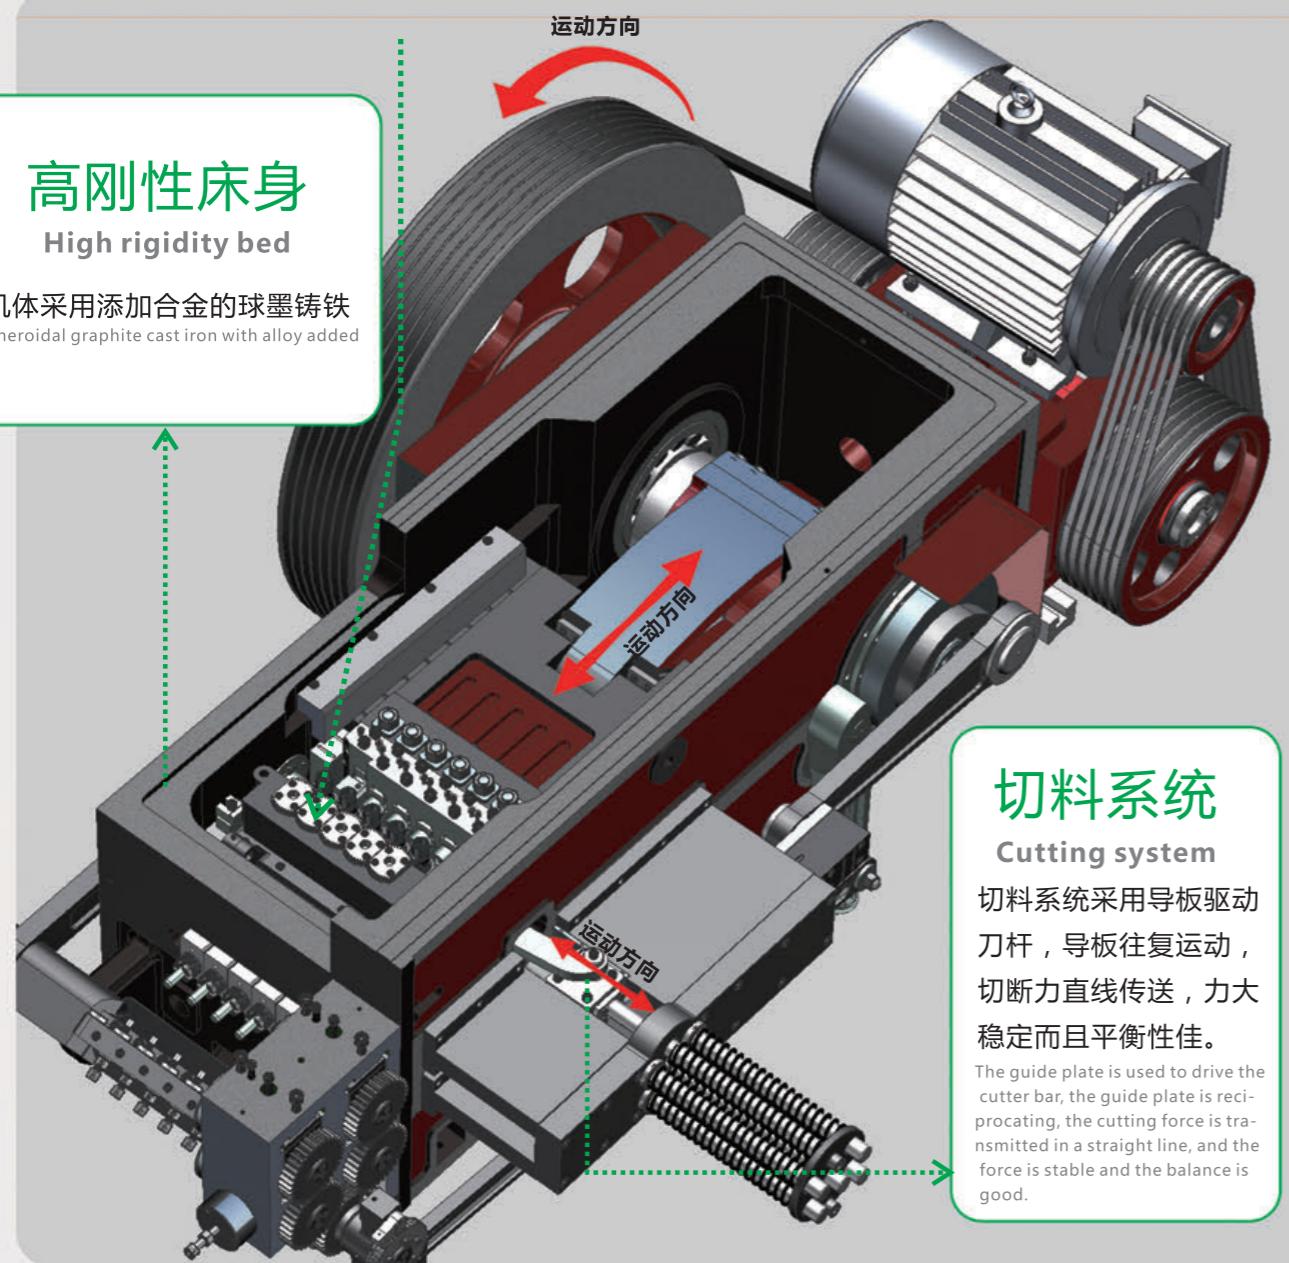

High quality design concept, casting high precision, high efficiency, high life, low loss.

钳架系统可以进行90、180度翻转，更利于成型工艺的安排。
The clamp frame system can be turned over 90 and 180 degrees, which is more conducive to the arrangement of molding process.

高刚性床身 High rigidity bed

机体采用添加合金的球墨铸铁
Spheroidal graphite cast iron with alloy added

切料系统 Cutting system

Cutting system

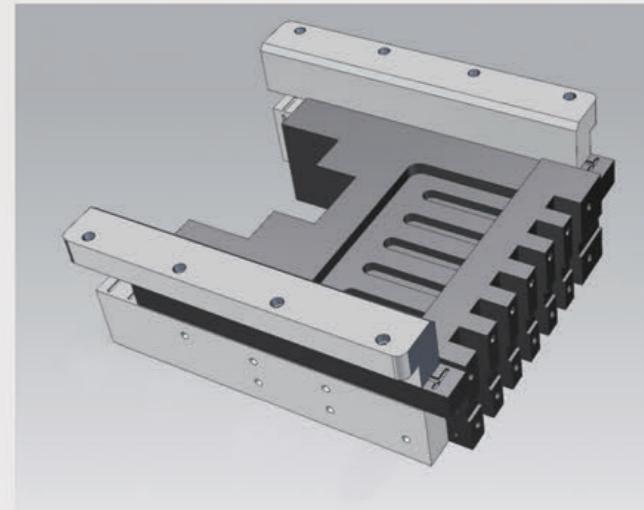

切料系统采用导板驱动刀杆，导板往复运动，
切断力直线传送，力大稳定而且平衡性佳。

The guide plate is used to drive the cutter bar, the guide plate is reciprocating, the cutting force is transmitted in a straight line, and the force is stable and the balance is good.

◆ 主滑块 Main slider

滑块T型设计，运行更加平稳，更有利于加工精密高，形状复杂的产品。

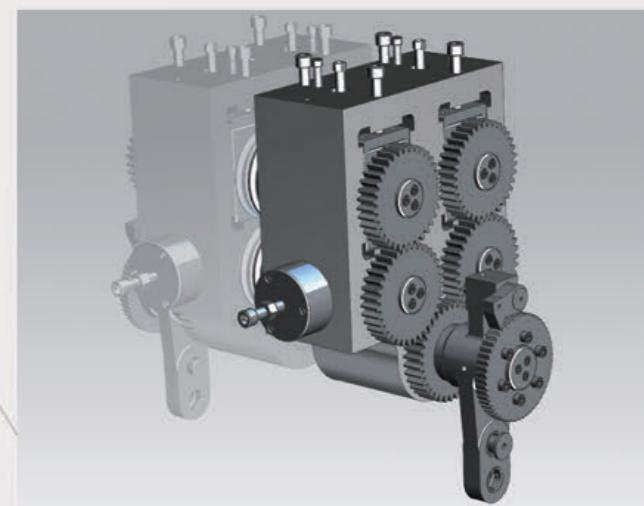

The T-shaped design of the slider ensures smoother operation and is more conducive to processing products with high precision and complex shapes.

◆ 送料部件 Feed part

棘轮机构，协调有序，齿轮经特殊处理，传动精度高，
耐磨性强、寿命高。

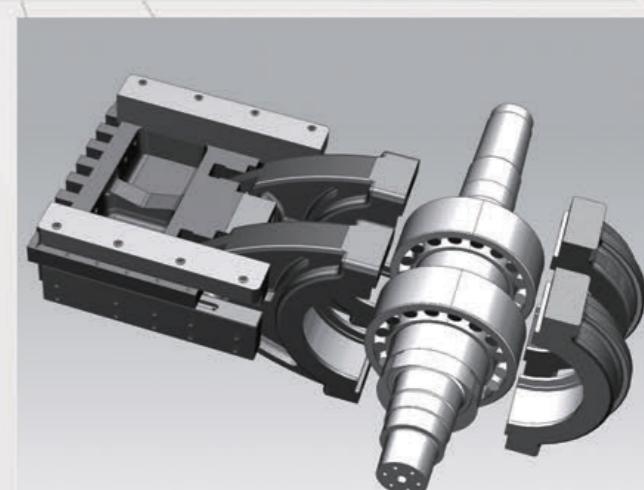

Ratcheting mechanism, coordinated and orderly, gear through special treatment, high transmission precision, strong wear resistance, high life.

◆ 轴承式 Bearing type

高品质的轴承，较低摩擦阻力、充足的润滑，设备运转高速灵活，产品精度稳定持久。

High quality bearings, low friction resistance, sufficient lubrication, high speed and flexible equipment operation, stable and durable products.

丰富的螺栓冷镦机系列产品能够满足各种超长零件的需要
The rich series of bolt cold heading machine products can meet the needs of various ultra long parts

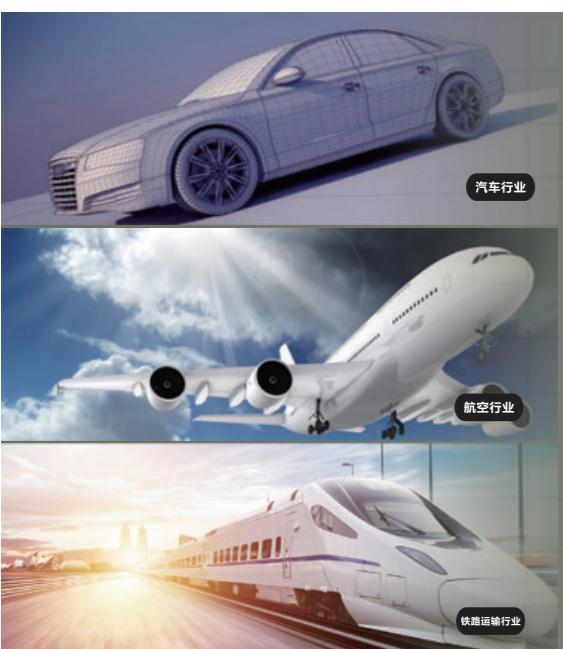

螺丝成型过程图
Screw forming process diagram

10B-19B多工位螺栓冷镦机
10B-19B Multi Station Bolt Cold Heading Machine

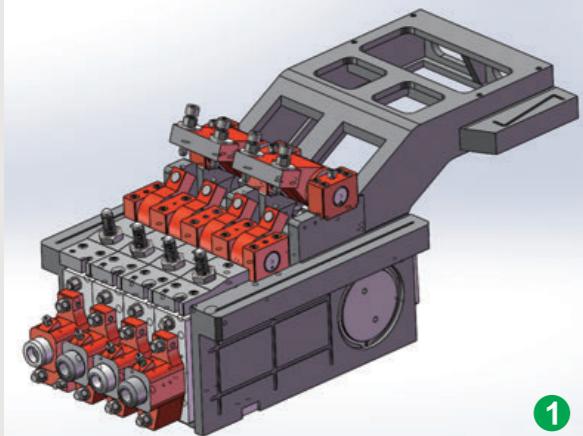

24B-50B多工位螺栓冷镦机
24B-50B Multi Station Bolt Cold Heading Machine

螺栓机内部结构图示例：

◆ 主滑块部分 Main slider section

1

滑块高稳定性，高精度的“马腿式”滑块，可上下左右调节。主滑块连接后翼的巧妙设计，底部都采用超耐磨的铸锡铜板，自动供油，保证机器滑块的长期运作精度。

The slider has high stability and is a high-precision "horse legged" slider that can be adjusted up, down, left, and right. The clever design of connecting the main slider to the rear wing, with ultra wear-resistant cast tin copper plates at the bottom, automatically supplying oil to ensure the long-term operation accuracy of the machine slider.

◆ 夹仔台部件 Clamping table parts

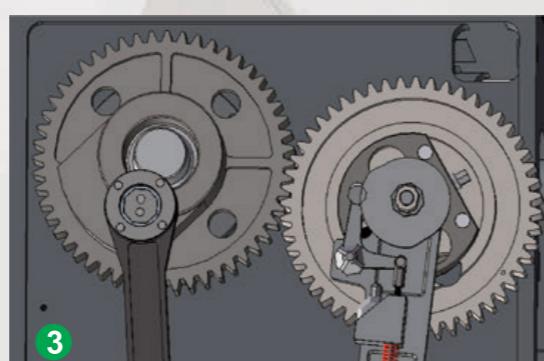

2

高精度多功能的夹仔台，可选择弹簧式夹仔台或气动式夹仔台，实现零件的平移或翻转。

High precision and multi-functional clamping table, spring type clamping table or pneumatic clamping table can be selected to realize translation or turnover of parts.

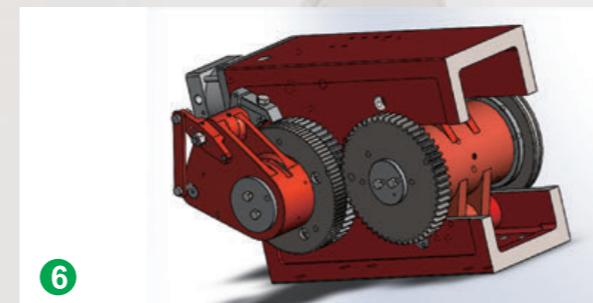

◆ 齿轮机构 Gear mechanism

送料大齿轮和切刀齿轮高精度的加工，齿面通过热处理后，采用进口的磨齿机磨齿，使得切刀机构和送料机构完美的契合。

High precision machining of feeding gear and cutter gear, After heat treatment, the imported grinding gear is used. The machine grinds the teeth to make the cutter mechanism and feeding mechanism complete. The fit of beauty.

◆ 送料部分 Feeding part

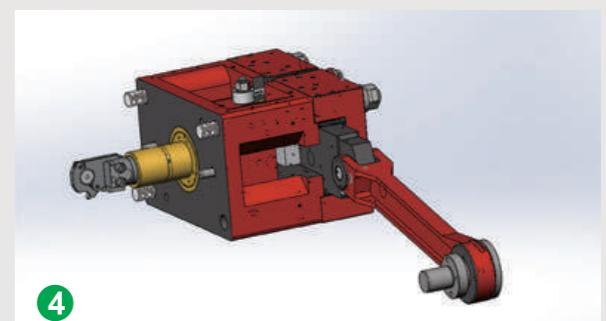

6

采用进口设备加工齿轮，保证齿轮精度，提高进料的精度。

Using imported equipment to process gears, Ensure gear accuracy and improve feed accuracy.

◆ 剪切部分 Shear section

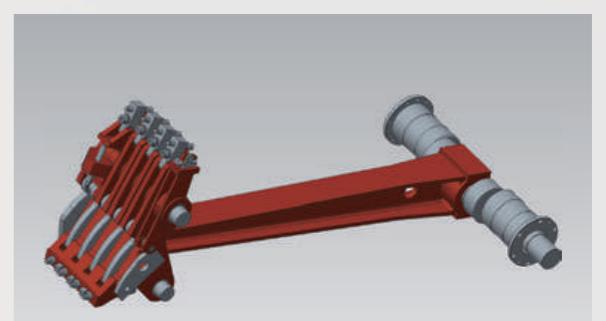

4

切料部份为滑块连杆驱动，曲轴传递连贯的剪切力，使剪短面整齐平整。

The cutting part is driven by slider and connecting rod and transmitted by crankshaft. Continuous shear force makes the short surface neat and smooth.

◆ 后托部分 Posterior part

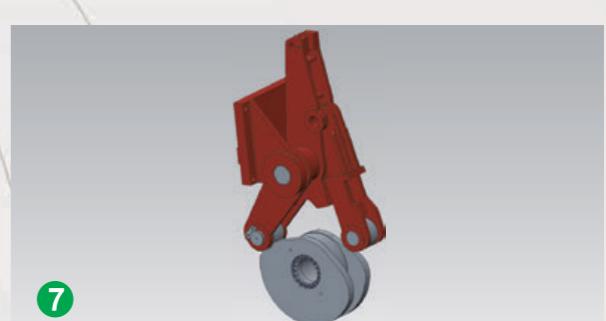

5

后托部分各工位的顶料长度可通过凸轮单独调整，也可更换凸轮实现切边。

The ejector length of each station of the back support part can be adjusted separately and the cam can be replaced to realize trimming.

◆ 移钳部分 Mobile forceps section

7

采用共轭凸轮夹钳传动机构，钳架往复运动更加平稳，高速运转更加稳定。

Adopting a conjugate cam clamp transmission mechanism, the reciprocating motion of the clamp frame is more stable, and the high-speed operation is more stable.

如有要求：可进行定制

As required: customizable

最佳的运动循环

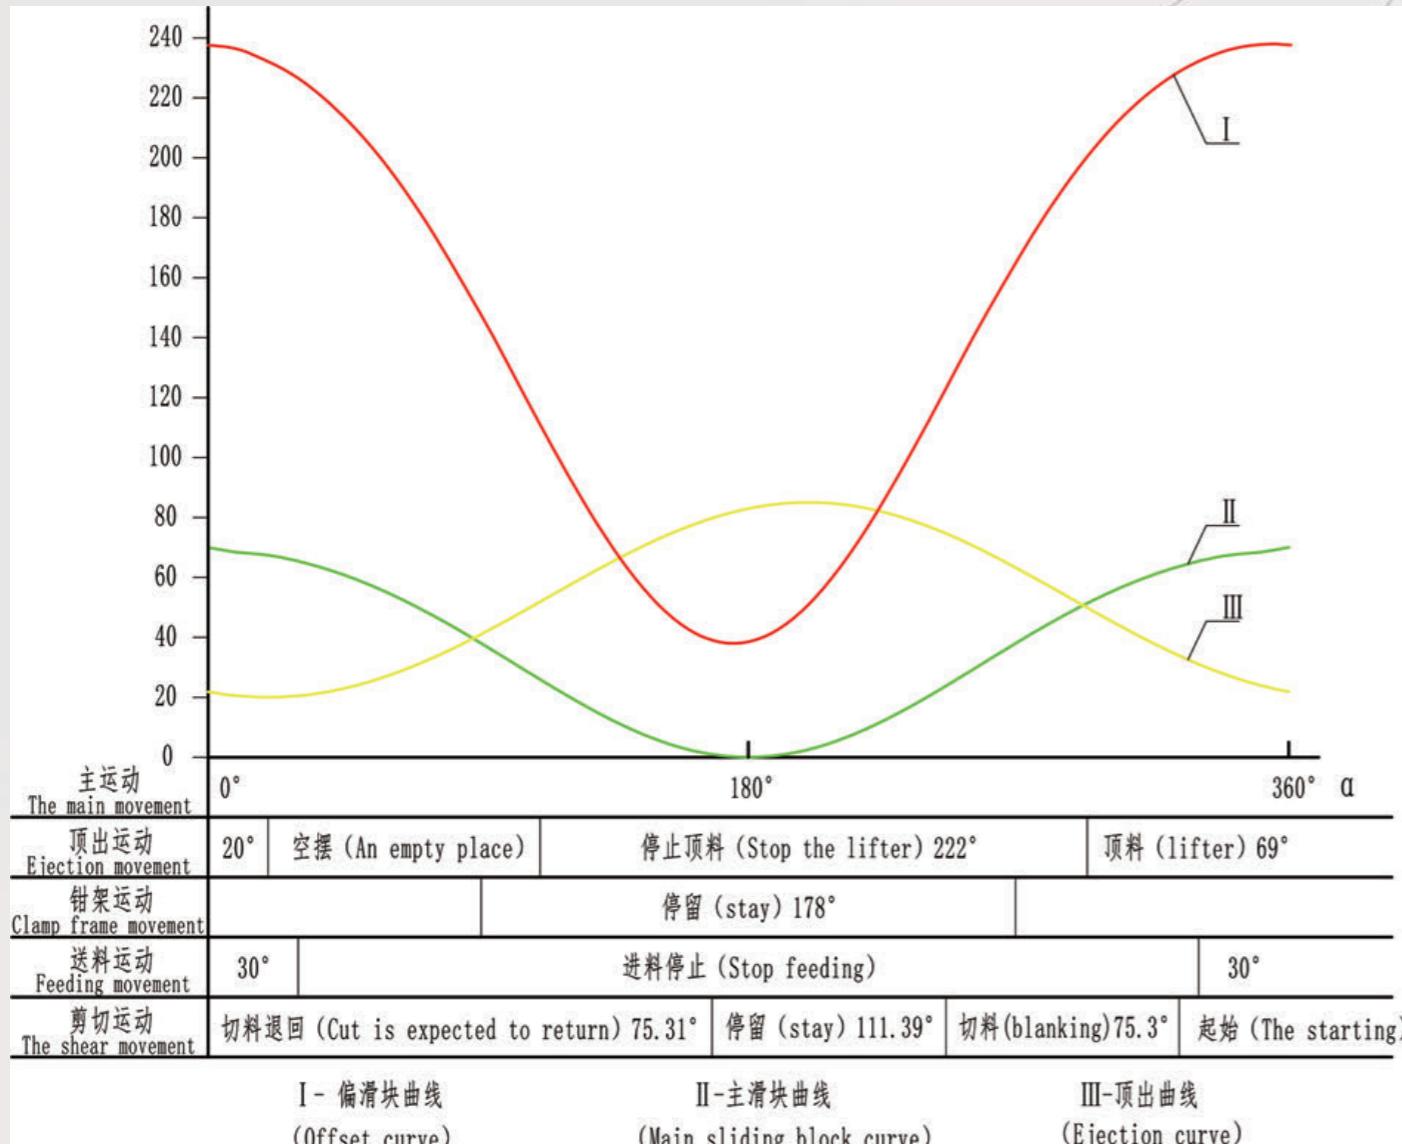

Optimal movement cycle

最经济的时间比例协调

The most economical time scale coordination

安全、平稳、高效能

Safety, stability, efficiency

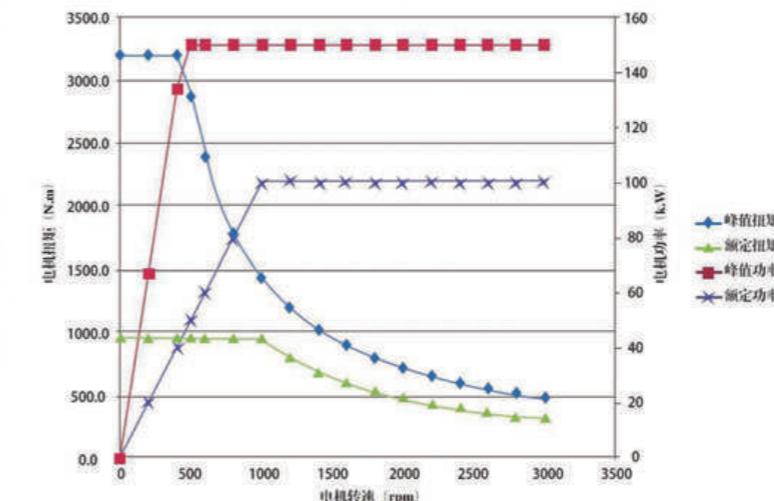

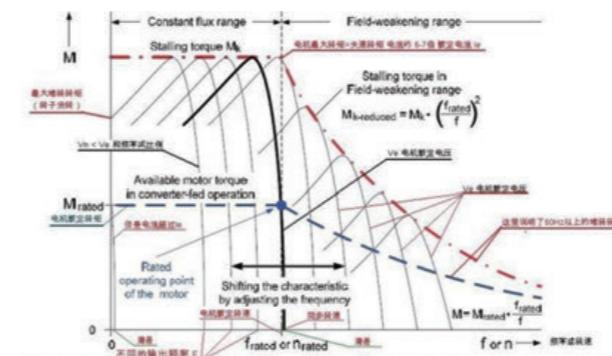

冷锻机运行/曲线图

Cold forging machine running / curve diagram

配电系统的先进特性

The advanced characteristics of the distribution system

◆ 安全保护----机器故障自动停止

Safety protection - automatic stop of machine failure

◆ 故障检测----机器异常操作自动报警

Fault detection - automatic alarm for machine abnormal operation

◆ 温度检测----时刻监视轴承与曲轴工作温度

Temperature detection - time monitoring of working temperature of bearing and crankshaft

◆ 油压检测----时刻监测油压情况，低油压报警

Oil pressure detection - time monitoring of oil pressure, low oil pressure alarm

◆ 计数----对作业数量进行统计

Counter - count the number of jobs

◆ 提高精度---实现了位置，速度和力矩的闭环控制，克服寸进问题

Improve the accuracy - the closed loop control of position, speed and torque can be realized to overcome the inching problem

◆ 适应性----抗过载能力强，能瞬间负载波动

Adaptability - strong resistance to overload and instantaneous load fluctuation

企业简介

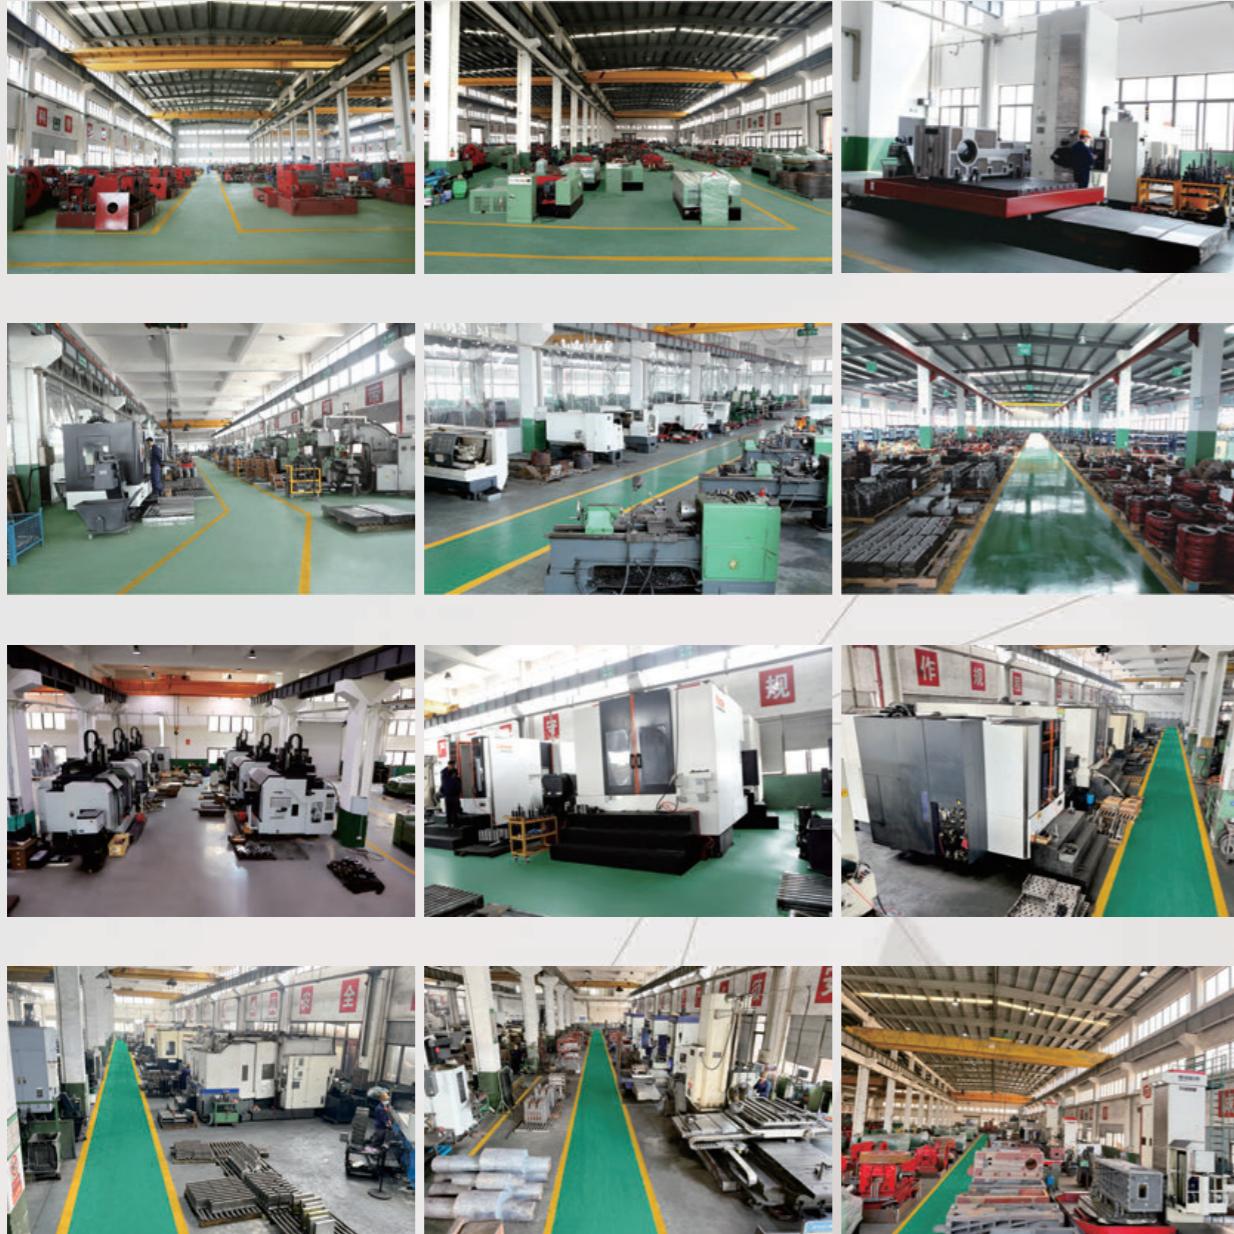

Brief Introduction

温州博宇机械有限公司位于温州空港新区，拥有两个生产加工基地，现有四万平方的标准厂房，从事金属冷镦成形机集研发、生产、销售于一体的国家高新技术企业。公司主要产品为全自动金属冷镦成形螺母、螺栓机；多工位冷镦成形螺母、螺栓机等系列产品，产品销往国内及海外等国家和地区，广泛应用于汽车、摩托车、铁路运输、工程机械、航空航天、能源、家电等企业。同时受到了广大客户的好评，并在同行业中领先之一。公司已通过了IS09001、IS045001、IS014001等管理体系认证，同时获得了浙江制造品字标认证及国际互认证书。公司拥有发明专利、实用新型专利80多项。公司先后荣获：国家高新技术企业、浙江省专精特新中小企业、省级企业技术研发中心、浙江省高成长科技型中小企业、浙江省科技型中小企业、温州市科技（创新）型企业、温州市信用管理示范企业等荣誉。公司坚持“以技术为先导、以质量求生存、以诚信待客户”为宗旨，欢迎国内外客户光临惠顾携手合作、共赢未来。

Wenzhou Boyu Machinery Co., Ltd. is located in Wenzhou Airport New Area, with two production and processing bases and a standard factory of 40000 square meters. It is a national high-tech enterprise that integrates research and development, production, and sales of metal cold heading forming machines. The company's main products are fully automatic metal cold heading forming nuts and bolt machines; A series of products such as multi station cold forging nuts and bolt machines are sold to domestic and overseas countries and regions, and are widely used in enterprises such as automobiles, motorcycles, railway transportation, engineering machinery, aerospace, energy, and home appliances. At the same time, it has received praise from a large number of customers and is one of the leaders in the same industry. The company has passed management system certifications such as IS09001, IS045001, and IS014001, and has also obtained Zhejiang Manufacturing Product Label Certification and International Mutual Recognition Certificate. The company has over 80 invention and utility model patents. The company has successively won honors such as National High tech Enterprise, Zhejiang Province Specialized, Refined, Special and New Small and Medium sized Enterprise, Provincial Enterprise Technology Research and Development Center, Zhejiang Province High Growth Science and Technology Small and Medium sized Enterprise, Zhejiang Province Science and Technology Small and Medium sized Enterprise, Wenzhou City Science and Technology (Innovation) Enterprise, Wenzhou City Credit Management Model Enterprise, etc. The company adheres to the principle of "technology as the guide, quality for survival, and integrity for customers", and welcomes domestic and foreign customers to visit and cooperate with us for a win-win future.

车间展示 Workshop display

工欲善其器，必先利其器

Advanced equipment

从零部件的车、铣、刨、磨、镗、热处理等机械加工，再到机械组装，我们拥有一整套生产流水线以及数百台先进的加工设备，如日本马扎克加工中心、大隈加工中心、韩国斗山加工中心，海天龙门铣、加工中心等更有先进的监测加工设备以及专业的设计操作团队和严格的生产管理体系。

From mechanical processing such as turning, milling, planing, grinding, boring, and heat treatment of components, to mechanical assembly, we have a complete set of production lines and hundreds of advanced processing equipment, such as the Mazak machining center in Japan, Okuma machining center, Doosan machining center in South Korea, Haitian Longmen milling, machining center, etc. More advanced monitoring and processing equipment, professional design and operation team, and strict production management system.

企业荣誉 Corporate honors

博宇的自信与骄傲来自客户的好评，来自广大用户和社会的支持，来自业界同仁的信任。翻开平日的荣誉证书，博宇人坚信：已有的荣誉与骄傲应让其在我们手中延续，将有的荣誉与骄傲，还会从我们手中创造.....

Boyu's confidence and pride come from customer praise, support from users and society, and trust from colleagues in the industry. Looking up their usual certificates of honor, Boyu people firmly believe that the existing honors and pride should be allowed to continue in our hands, and the honors and pride that will be present will be created from our hands.
